Attachment I	Summary of Monthly Bill Impacts With and Without Energy Efficiency Enabling Provision Adjustments by Sector and Rate Schedule
--------------	---

SOUTHWEST GAS CORPORATION

I. INTRODUCTION

Southwest Gas Corporation (Southwest Gas or the Company) hereby submits its 2014 fourth quarter report on the performance of the Energy Efficiency Enabling Provision (EEP).

In its Opinion and Order in Docket No. G-01551A-10-0458, Decision No. 72723, the Arizona Corporation Commission (Commission) authorized Southwest Gas to implement the EEP. The EEP contains two components, a weather adjustment and an annual non-weather component to ensure the Company recovers its Commission authorized revenue per customer. The weather component adjusts customer bills when actual weather during the winter months (November – April) varies from the normalized weather used in the development of authorized rates. The EEP also tracks the non-weather differences between the Company's authorized revenues per customer and its actual revenues per customer and includes a process to recover under-collections from and return over-collections to customers on an annual basis. The combination of these two components results in the Company recovering its Commission-authorized revenue per customer - no more, no less.

The weather adjustment affects bills for service rendered from November 1 through April 30. During the reporting period of October through December 2014, the weather adjustment affected bills for service rendered during November and December. 2014 was the warmest year ever recorded for the State of Arizona. Southwest Gas' Phoenix and Tucson customers experienced weather during this reporting period that was approximately twenty-four (24) percent and twelve (12) percent warmer overall than the historical average, respectively. Even with the historically warm weather, the average residential EEP adjustment (including both the weather adjustment and non-weather component) was \$2.23. While a number of customers received bill adjustments consistent with warmer than normal weather, customers in billing cycles that experienced colder than normal weather received bill credits.

Customers also received a credit of \$0.00387 per therm for October through December 2014 for the non-weather component of the EEP.

II. DISCUSSION

This report is for the quarterly period October 1, 2014 through December 31, 2014. Bill analyses have been prepared by residential and non-residential sectors and by rate schedule. The rate schedules included in the residential sector are Single-Family Residential (Schedule No. G-5), Multi-Family Residential (Schedule No. G-6), Single-Family Low Income Residential (Schedule No. G-10), and Multi-Family Low Income Residential (Schedule No. G-11). The rate schedules included in the non-residential sector are Small General Service (Schedule No. G-25(S)), Medium General Service

(Schedule No. G-25(M)), Large-1 General Service (Schedule No. G-25(L1)), and Large-2 General Service (Schedule No. G-25(L2)).

As described above, the EEP contains two components, a weather adjustment and an annual non-weather component to ensure the Company recovers its Commission authorized revenue per customer. The weather adjustment works to mitigate the “peaks and valleys” that abnormal weather can have on customer bills. The annual non-weather component compares authorized revenues and actual revenues and recovers or returns differences between authorized and actual revenues in a per therm rate adjustment. In April 2013, Southwest Gas filed an application with the Commission, seeking to return a deferred credit balance in the non-weather revenue component of approximately \$1.9 million to customers. The application was approved in December 2013 (Decision No. 74252) and a credit of \$0.00387 per therm became effective January 1, 2014. This quarterly report shows the effect of both components on customer bills during the fourth quarter of 2014.

Table 1 summarizes the fourth quarter bill impacts for the residential and non-residential sectors. Average EEP adjustments were consistent with weather that was warmer than normal. However in the fourth quarter, the weather adjustments were offset by the credit to customers for the non-weather component of the EEP.

Table 1- Average Bill by Sector			
	<u>W/EEP Adjustment</u>	<u>W/O EEP Adjustment</u>	<u>Difference</u>
Residential Sector	\$38.51	\$36.28	\$2.23
Non-Residential Sector	\$418.99	\$412.50	\$6.49

Table 2 summarizes the results for the 2014 fourth quarter for each customer class included in the EEP.

Table 2- Average Bill by Customer Class			
	<u>W/EEP Adjustment</u>	<u>W/O EEP Adjustment</u>	<u>Difference</u>
Single-Family Residential	\$39.41	\$37.07	\$2.34
Single-Family Low Income	\$28.50	\$27.42	\$1.08
Multi-Family Residential	\$26.63	\$25.92	\$0.71
Multi-Family Low Income	\$22.95	\$22.50	\$0.45
Small General Service	\$50.95	\$49.52	\$1.43
Medium General Service	\$281.23	\$276.43	\$4.80
Large-1 General Service	\$1,397.47	\$1,375.69	\$21.78
Large-2 General Service	\$7,019.24	\$6,968.41	\$50.83

Attachment I contains schedules showing the detail of the differences between average bills with the EEP adjustment and average bills without the EEP adjustment for residential/non-residential sectors and for each rate schedule for the quarter and by month for October, November and December 2014.

III. SUMMARY

As illustrated in Tables 1 and 2, the EEP continues to perform as intended. The weather adjustment has stabilized customer bills by reflecting normal weather conditions and providing customers timely relief from colder than normal weather when their natural gas bills are the highest, and upward adjustments to bills when the weather is warmer than normal and bills are the lowest. The annual non-weather component ensures the Company only recovers its authorized revenue per customer. Customers are currently

experiencing the benefit of the non-weather component as the deferred balance is refunded through rates.

The Company's next quarterly report will reflect the difference between January, February and March bills with and without the two EEP components.
